

## MCDB Research Projects: 198A-B-C/199A-B/199

**Please answer the specific questions on this page. You may attach a separate sheet to do so, but please do not refer the reader to your paper to find the answers. Every time you turn in a draft or finalized version of your paper to the MCDB Student Affairs Office, please include a completed and signed copy of this form. Your paper will be returned if this form is not attached to the front.**

Date:

Name:

UID:

E-mail address:

In the space below, write a brief paragraph that includes the following:

- 1) A description of your project. Explain all unfamiliar (to the reader, me) abbreviations or acronyms you use, e.g. do not write "I work on P21-345," etc, without explicitly defining that term, as well as any other such terms you use.
- 2) State exactly what you will do or did do in this project , including techniques, as opposed to what others in the lab are doing, e.g. "I will run gels to locate and isolate a DNA fragment," or "I will sequence DNA," etc.
- 3) State what you found or what you expect to find (make a guess if necessary).
